Product Description

There is no lighter handle than one which cannot be seen or which you simply sense is there. Starting from this premise, Viefe has developed some handles that play majestically with light and transparency. The Tress handle is thin, but in contrast it has a greater thickness. Its sides also have a shiny chrome finish. It comes in several different translucent colours: grey, violet, brown and green. Four options to maximize a piece of furniture which shares the same tones or to add a touch of colour to light furniture. It is also available in a transparent version and in black and white for other types of application. Whichever you choose it is sure to give an interesting result.

Tress belongs to the [Zamak + Acrylic](#) line. Model [0260](#).

Included Products
