Material	Zinc Zamak
Mounting Type	M4 Machine Screw
Overall Length	180 mm
Projection (Height)	17 mm
Type	Pull
Width	17.4 mm

Product Description

This integrated handle needs very little introduction to the plain, smooth and minimalist concepts it includes within its basic design. It is manufactured using precision Zinc Zamak diecasting and can be installed into the sides of doors and drawers using a quick and easy installation process. It has been designed with the idea of bringing an aesthetic and low volume solution to bathroom vanities and kitchen cabinets. It's also ideal for large panels of drawers as its design is really discrete.

Owing to the great success it has had since its launch, we have increased the range of sizes and finishes available. At the moment we can find it in bright chrome, brushed nickel, matt white, matt grey and matt black, all of which come in sizes of 90mm and 180mm and combine well with the Nest handle (mod. 105) which can be fitted to the upper or lower part of Hide. In the purely chrome finish it is only available in the 200mm size and, owing to its length, can only be used on its own. Choosing the handle in the same colour as the piece of furniture (white, grey or black) increase its camouflage efffect and provides a visible effect so that the handle and furniture are perceived as being one.
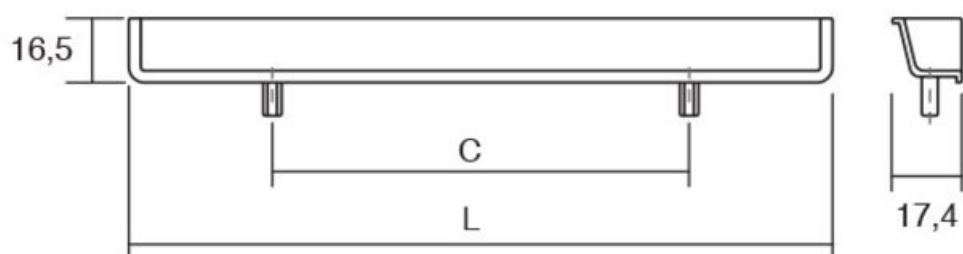

A unique way to install this handle is to integrate the hidden Hide handle above an exposed lower Nest handle. Both sizes can work well in this application and it is demonstrated in the following picture.

Included Products

Industry standard mounting hardware
