Product Description

The Kares handle has a versatile design which works well in all types of spaces, especially in kitchens with contemporary aesthetics. Its triangular shape means it is original with its own style and can adapt perfectly to any type of electrical appliance with a metal finish. In modern kitchens which combine cupboards with different materials and colours, the handle acts as a unifying element which gives meaning and continuity to the aesthetics of the kitchen. This can be fully appreciated in the images.

Kares is fully ergonomic and is available in three finishes: shiny chrome, brushed nickel and matt white. It also comes in three sizes: 32, 96 and 192mm which allow you to give it more or less protagonism depending on the type of kitchen into which it will be fitted.

Kares belongs to the Zamak line. Model 0306.
Designed by Alexis Vivet.
